Subject: Development of Land Records S/W in web-based Open Source for Manipur.

As discussed over VC on 16/10/2015 and 30/10/2015 on generic Land Records S/W for NE Region. Necessity of development in open source web-based S/W with features like DSC, Aadhar, e-Payment Gateway and SMS alert.

Manipur State has been running Land Records S/W since 2004 in Client Server and at present migration to web enabled Land Records S/W is operational using ASP.NET & SQL Server.

Development of additional new features on linking with Property Registration and Bhunaksha may be initiated with the support of DoLR. Further, two Senior Programmers will be required for development in open source platform for one year.

Submitted for advice please.

Tarakishori (PSA).

SIO Manipur

Two programmers for 12 months may kindly arranged for DoLR to develop web based s/w in Open Source as per the features mentioned above.
